

High-Performance General Industrial and Railcar Coatings

EPS® 2585

A high-solids waterborne acrylic emulsion for high-performance general industrial and railcar coatings, with excellent hardness, block resistance and early water resistance.

Benefits

- Hardness and block resistance at low VOC
- Corrosion resistance even without the use of anticorrosive pigments
- Early water resistance
- Multi-substrate adhesion
- Gloss retention
- Can be formulated at <100 g/L VOC
